

Structural Glazed Tile

Structural Glazed Tile (SGT) are ceramic glazed structural masonry units that provide a distinctive, quality finish to both interior and exterior projects.

Available in a palette of beautiful colors, SGT is a durable building product appropriate for either loadbearing or non-loadbearing applications. Its impervious glazed surface resists fading, impact, fire, graffiti, and abrasion, making it a cost-effective solution for any project.

Structural Glazed Tile Product Information

Colors

In addition to our standard color offerings, Elgin Butler offers a complete range of custom colors that will **last the lifetime of your building**. Through research, development and testing for custom colors, Elgin Butler meets the needs of imaginative designers.

Structural Glazed Tile Options

SGT Units are available in standard stretchers, shapes and cove base units. Special shapes can also be manufactured.
