

EB GLAZED THIN BRICK

ELEGANT DESIGN • DURABILITY INSPIRATION

ARM Architecture were engaged to extend the National Museum of Australia's workplace and consolidate the staff into one wing of the museum's building and create a public face for the staff. Part of that design solution was to connect two existing buildings, a 1940's cream brick heritage single story and a 2-story anodised aluminium administration wing. We wanted to create a new identity for the museum staff and selected the Elgin Butler glazed tile for its handmade look and range of colours.

The tile enabled us to create a coloured heat pattern combined with a QR code that references both the conservation & curatorial work of the museum.

Sophie Cleland, Senior Associate, ARM ARCHITECTURE

EB Glazed Thin Brick offers the same look and durability as standard masonry, but without the extra footings and weight limitations. It is perfect for both interior and exterior applications and is available in an array of traditional brick sizes. Designers can easily pair EB Glazed Thin Brick with full bed glazed masonry units to offer a creative and durable design.

Textures: Acapulco, Velour, Mottle, Glossy, Semi-Gloss, Satin, Matte, Ultra-Matte
Contact the manufacturer for minimum order requirements.

Benefits:

- Integral ceramic finish is resistant to fading and most chemicals
- Kiln-fire at over 2000°F, exceeding industry standards
- Graffiti, stain, impact, abrasion and weather resistant
- Will never peel, discolor or need painting
- Fire resistant with zero flame-spread properties, emitting no toxic fumes
- Environmentally sound—impervious glazed surface cleans with soap and water, never needs refinishing
- Custom colors available
- Made in the U.S.A.
- Can be installed by mason, tile setter or precast systems

Specifications:

EB Glazed Thin Brick - The ceramic glaze properties of finish shall be according to ASTM C1405, Grade S, Type I, Class Exterior, and fused to the body at temperatures in excess of 2000°F. The physical properties shall be according to ASTM C1088, Type TBX, Grade Exterior.

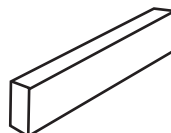

Note:

Modular-size thin brick is available in PCI specifications
